DETAILED ACTION

1. This is in response to the amendment filed on 06/29/2007.

Claims 1-17 remain pending for examination.

After further review of the indicated allowed claims 1-4 and 13-17, the indicated allowability has been withdrawn. A new ground(s) of rejection is made in view of:

- I.) APA.
- II.) USPNo. 5,835,911 issued to Nakagawa et al.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- I.) Claims 1-17 are rejected under 35 U.S.C. 102(a) as being anticipated by applicant background, admitted art, APA ("APA").

As per claim 1, APA discloses "a method for upgrading a database" [i.e., database upgrading, previous versions; page 1, lines 18-19], comprising:

"updating a message from a first version to an upgraded version by chaining through intermediate versions" [i.e., version database is a specific schema and the specific data in the structures, databases are embodied in a series of versions, each with a changed schema and new data elements. A new version of the database is generated from an old one by upgrading its schema and mapping its data to the new schema. Database software generally support upgrading from any of several previous versions;

see page 1, lines 13-19], "wherein updating comprises: receiving an update message having a first

version format; and repeatedly generating a revised update message having a next most recent version

format based on the update message until a final update message having an upgraded version format is

generated" [i.e., in a redundancy environment, upgrading is sometimes performed by upgrading a mirror

image database to the new version and then at the appropriate time switching to use the mirror image as

the primary database, process, upgrading is performed by receiving database update messages from a

previous version and mapping them into the schema of the new version, an empty database structure

conforming to the schema of the new version is created to accept these mappings; see page 2, lines 1-8].

As per claim 2, APA discloses "generating a revised update message having a next most recent

version format includes: receiving a first update message; and calling a next most recent version mapping

function to map contents of the first update message to generate a second update message" [i.e., each

with a changed schema and new data elements. A new version of the database is generated from an old

one by upgrading its schema and mapping its data to the new schema. Database software will generally

support upgrading from any of several previous versions; see page 1, lines 15-19; process, upgrading is

performed by receiving database update messages from a previous version and mapping them into the

schema of the new version, an empty database structure conforming to the schema of the new version is

created to accept these mappings; see page 2, lines 4-8].

As per claim 3, APA discloses "the update message includes a set of records for a database in

the first version" [see page 1, lines 15-18].

As per claim 4, APA discloses "the set of records for the database in the first version is a

complete set of records for the database" [see page 1, lines 15-18].

Page 4

As per claims 5-8, the limitations of claims 5-8 are similar to claims 1-4, therefore, the limitations

of 5-8 are rejected in the analysis of claims 1-4, and these claims are rejected on that basis.

As per claims 9-12, the limitations of claims 9-12 are similar to claims 1-4, therefore, the

limitations of 9-12 are rejected in the analysis of claims 1-4, and these claims are rejected on that basis.

As per claims 13-17, the limitations of claims 13-17 are similar to claims 1-4, therefore, the

limitations of 13-17 are rejected in the analysis of claims 1-4, and these claims are rejected on that basis.

II.) Claims 1-17 are rejected under 35 U.S.C. 102(9) as being anticipated by USPNo.

5,806,078 issued to Hug et al., ("Hug").

As per claim 1, Hug discloses "a method for upgrading a database" [see col. 79, lines 5-23],

comprising:

"updating a message from a first version to an upgraded version by chaining through intermediate

versions" [i.e., version data file 40 and the difference data file 42 to reflect the changes in the subsequent

version col. 6 lines 38-41], "wherein updating comprises:

"receiving an update message having a first version format" [i.e., regenerating version (20); see

col. 5, lines 38-46]; and "repeatedly [i.e., iteratively repeat; see col. 5, lines 58-60] generating a revised

update message having a next most recent version format based on the update message until a final

update message having an upgraded version format is generated" [see col. 5, lines 48-56].

As per independent claims 5, 9 and 13 the limitations of independent claims 5, 9 and 13 are

similar to the independent claim 1, therefore, the limitations of independent claims 5, 9 and 13 are

rejected in the analysis of independent claim 1, and these claims are rejected on that basis.

As per claims 6-8, the limitations of claims 6-8 are similar to claims 1, 5, 9 and 13, therefore, the limitations of 6-8 are rejected in the analysis of claims 1, 5, 9 and 13, and these claims are rejected on that basis.

As per claims 10-12, the limitations of claims 10-12 are similar to claims 1, 5, 9 and 13, therefore, the limitations of 10-12 are rejected in the analysis of claims 1, 5, 9 and 13, and these claims are rejected on that basis.

As per claims 14-17, the limitations of claims 14-17 are similar to claims 1, 5, 9 and 13, therefore, the limitations of 14-17 are rejected in the analysis of claims 1, 5, 9 and 13, and these claims are rejected on that basis.

Response to Arguments

Applicant's arguments, filed on 06/29/2007 with respect to all pending claims have been fully considered but they are not persuasive. Because of the 35 USC 102 rejections.

The broadest reasonable interpretation of the claims must also be consistent with the interpretation that those skilled in the art would reach. In re Cortright, 165 F.3d 1353, 1359, 49 USPQ2d 1464, 1468 (Fed. Cir. 1999).

CONTACT INFORMATION

2. Any inquiry concerning this communication or earlier communications from the examiner should

be directed to JEAN B. FLEURANTIN whose telephone number is 571 - 272-4035. The examiner can

normally be reached on 7:05 to 4:35.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

JOHN E BREENE can be reached on 571 – 272-4107. The fax phone number for the organization where

this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained from

either Private PAIR or Public PAIR. Status information for unpublished applications is available through

Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC)

at 866-217-9197 (toll-free).
